Dimensions	Materials	Weight
Lady Bugs 18"L x 27"W x 12"H	Carved Red Cedar with Black Walnut spots	25lbs each

Three-fourths of the world's flowering plants and about 35 percent of the world's food crops depend on pollinators to reproduce. In addition to protecting your favorite garden plants from aphid damage, ladybugs also pollinate flowers. As they move among flowers, they move pollen and fertilize the flowers so they can produce seeds.
